SUBJECT INDEX

Animal cells
Calorimetric studies of heat flux in animal cells, 253
Aquatic animals
A novel 1 liter flow-through calorimeter for heat production measurements on aquatic animals without stress, 41
Arum lily
Analysis of heat production in a thermogenic arum lily, *Philodendron selloum*, by three calorimetric methods, 91

Basal metabolism
The contribution of the sodium pump to the basal metabolism of isolated cardiac muscle: a calorimetric study, 269
Batch microcalorimetry
A bioassay of pollutants from animal house air by batch microcalorimetry, 183
Bench-scale calorimetry
Bench-scale calorimetry in biotechnology, 243
Biotechnology
Large-scale calorimetry and biotechnology, 215
Bench-scale calorimetry in biotechnology, 243
Bombus lapidarius
Heat loss and thermoregulation in a nest of the bumblebee *Bombus lapidarius* (Hymenoptera, Apidae), 57
Bumblebee
Heat loss and thermoregulation in a nest of the bumblebee *Bombus lapidarius* (Hymenoptera, Apidae), 57

Caecal flora
In vitro energy conversion of sugars and sugar substitutes by rat caecal flora, 173
Cardiac muscle
The contribution of the sodium pump to the basal metabolism of isolated cardiac muscle: a calorimetric study, 269
Cellulose
DSC, DTA, and TG of cellulose untreated and treated with flame-retardants, 99
Cereal
DSC studies of starch in cereal and cereal products, 441
Chromatin
Conformational changes in nucleic acids/chromatin structure, 391

Drug binding
Flow microcalorimetry for human erythrocyte hemolysis induced by ionic drug binding, 287

Ecology
Calorimetry in ecology, 107
Enzymes
Thermodynamics of enzymes in unusual environments, 349
Erythrocyte hemolysis
Flow microcalorimetry for human erythrocyte hemolysis induced by ionic drug binding, 287

Flame-retardant
DSC, DTA, and TG of cellulose untreated and treated with flame-retardants, 99
Flow microcalorimetry
Flow microcalorimetry for human erythrocyte hemolysis induced by ionic drug binding, 287
Flow-through calorimeter
A novel 1 liter flow-through calorimeter for heat production measurements on aquatic animals without stress, 41
Food
Thermal behaviour of foods, 417

Heat flux
Calorimetric studies of heat flux in animal cells, 253
Heat loss
Heat loss and thermoregulation in a nest of the bumblebee *Bombus lapidarius* (Hymenoptera, Apidae), 57
Heat production
A novel 1 liter flow-through calorimeter for heat production measurements on aquatic animals without stress, 41
Analysis of heat production in a thermogenic arum lily, *Philodendron selloum*, by three calorimetric methods, 91
Hybridoma cells
Calorimetric studies of lymphocytes and hybridoma cells, 281
Hymenoptera, Apidae
Heat loss and thermoregulation in a nest of the bumblebee *Bombus lapidarius* (Hymenoptera, Apidae), 57

Infants
Calorimetry of newborn infants: techniques and applications, 49

Large-scale calorimetry
Large-scale calorimetry and biotechnology, 215

Lymphocytes
Calorimetric studies of lymphocytes and hybridoma cells, 281

Megacalorimetry
Large-scale calorimetry and biotechnology, 215
Membranes
Biological calorimetry: membranes, 299
Microbes
On-line estimation of biological oxygen demand using direct calorimetry on surface attached microbial cultures, 135
Microbiological calorimetry, 145
Microbial cultures
On-line estimation of biological oxygen demand using direct calorimetry on surface attached microbial cultures, 135
Microcalorimetry
Flow microcalorimetry for human erythrocyte hemolysis induced by ionic drug binding, 287

Newborn
Calorimetry of newborn infants: techniques and applications, 49
Nucleic acids
Conformational changes in nucleic acids/chromatin structure, 391

Oxygen demand
On-line estimation of biological oxygen demand using direct calorimetry on surface attached microbial cultures, 135

Pharmaceutical
Pharmaceutical calorimetry: a selective review, 195
Philodendron selloum
Analysis of heat production in a thermogenic arum lily, *Philodendron selloum*, by three calorimetric methods, 91
Plant
Plant calorimetry: how to quantitatively compare apples and oranges, 67
Pollutants
A bioassay of pollutants from animal house air by batch microcalorimetry, 183
Pollution
Calorimetric investigations of pollution by xenobiotics, 125
Protein
Proteins in aqueous solutions. Calorimetric studies and thermodynamic characterization, 363

Rat
In vitro energy conversion of sugars and sugar substitutes by rat caecal flora, 173

Sodium pump
The contribution of the sodium pump to the basal metabolism of isolated cardiac muscle: a calorimetric strudy, 269
Starch
DSC studies of starch in cereal and cereal products, 441
Stress
A novel 1 liter flow-through calorimeter for heat production measurements on aquatic animals without stress, 41
Sugar
In vitro energy conversion of sugars and sugar substitutes by rat caecal flora, 173

Thermoregulation
Heat loss and thermoregulation in a nest of the bumblebee *Bombus lapidarius* (Hymenoptera, Apidae), 57

Whole-body calorimetry
Whole-body calorimetry in man and animals, 1

Xenobiotics
Calorimetric investigations of pollution by xenobiotics, 125
